- Fare type (optional)

Expert mode isn't a forecasting tool. Availability in certain fare classes doesn't mean other ones will become available.

Select Fare type 

- Upgrades aren't always cleared in real time. Our process for clearing upgrades varies based on the type of upgrade and when it becomes available.

Date and time format preference

- Upgrades are processed by an automated system or at the gate prior to departure. Phone agents aren't able to clear pending upgrades.

Date format

☐ July 15 ☒ 15 July

- Availability changes frequently, so sometimes the information in expert mode may not be completely up to date.

Time format

☐ 12 hour ☒ 24 hour
☐ clock ☒ clock

Bugs Found Per Month

Andrej Karpathy ✓
@karpathy

There's a new kind of coding I call "vibe coding" where you fully give in to the vibes, embrace exponentials, and forget that the code even exists. It's possible because the LLMs (e.g. Cursor Composer w Sonnet) are getting too good. Also I just talk to Composer with SuperWhisper so I barely even touch the keyboard. I ask for the dumbest things like "decrease the padding on the sidebar by half" because I'm too lazy to find it. I "Accept All" always, I don't read the diffs anymore. When I get error messages I just copy paste them in with no comment, usually that fixes it. The code grows beyond my usual comprehension, I'd have to really read through it for a while. Sometimes the LLMs can't fix a bug so I just work around it or ask for random changes until it goes away. It's not too bad for throwaway weekend projects, but still quite amusing. I'm building a project or webapp, but it's not really coding – I just see stuff, say stuff, run stuff, and copy paste stuff, and it mostly works.

1. Responsive Design

Bug: Context menu is cut off

- Mobile-first design
- End-to-end testing on mobile devices
 - Use frameworks like WebdriverIO to test on simulators/emulators and real devices
 - Alternatively, Playwright offers emulation (not as good)

2. Glitching

- End-to-end testing
- “Dogfooding”
- Exploratory Testing

due to a genuine bug, but instead of

Correctness · Correct your spelling ⓘ

...a genuine ~~bugbug~~ **bug bug**, but instead...

Accept

Dismiss

2. Glitching

Heatmap Visualization

- “Dead clicks”
 - Click on element, nothing happens
- “Rage clicks”
 - Repeated clicks out of frustration
 - Point of friction
 - Broken element
- Open Source Tool: [Posthog](#)

3. Unresolved templating

Included Software

☐ _NOT_AVAILABLE_ (3)

☐ Creative Projection (35)

3. Unresolved templating

Bug: Placeholders not replaced

- Unit-/Integration testing
 - Test email templates, assert all placeholders missing
- Test edge cases:
 - No value
 - Very long value
 - UTF-8 characters

👉 We would like to remind you that the reception is open XNUMX/XNUMX every day.

4. Unfiltered error message

Cannot read properties of undefined (reading 'toString')

Application error: a client-side exception has occurred (see the browser console for more information).

4. Unfiltered error message

Bug: Error message shown to user is generated from library/framework used

- Can be security or usability issue
- Turn off stack traces in the UI in production
- In production, only show explicit errors returned from backend
 - Otherwise show generic error message
“An unexpected error occurred, please try again later or contact ... if the issue persists.”
- Add alerting for errors from frontend and backend

Server Error in '/_mvc' Application.

Response is not available in this context.

Exception Details: System.Web.HttpException: Response is not available in this context.

Stack Trace:

```
[HttpException (0x80004005):  
Response is not available in  
this context.]  
System.Web.HttpContext.get_Response() +11822135  
[REDACTED].Web.MvcApplication.Application_Start() in  
C:\Users\WorkBox\Source\Workspaces\[REDACTED]\[REDACTED]\[REDACTED]\[REDACTED].Web\Global.asax.cs:47
```

The field Coupon must match the regular expression `^[a-zA-Z0-9_]{4,30}$`.

5. Unfiltered debug information

Bug: Debug information shown to users

- Turn off debug flags for production
 - If you must, use feature flags for specific users
- Prevent SQL injection and XSS

6. Text keys

Bug: Text keys showing

- Unit-/Integration testing
- Libraries like i18next can log warning when text key is not translated
 - Effective in combination with component tests where test fails on console warnings but requires good test coverage
- Flashing of text keys
 - Use SSR
 - Show skeleton screen when i18n files not loaded yet

COMPLEMENT YOUR PURCHASE

VIEW ALL ACCESSORIES

???BLUE_LIGHT_FILTER_DISCLAIMER???

7. Incorrect/missing information

Bug: Incorrect information being shown

- Use four-eyes principle when entering data
- Add validations in case of data being significantly different from previous
- When fetching data from an API, especially in finance: perform plausibility checks
 - In case of unexpected data, alert and show old data with notice or display error message
